"SAN JOSE MAYETTE" WALNUT

Leonard Coates Nursery Co.

INCORPORATED

Established, 1878

Incorporated, 1905

MORGANHILL, SANTA CLARA COUNTY
CALIFORNIA

We consider it no trouble to answer letters, and gladly furnish any information not contained in our printed circulars.

“California Fruits and How to Grow Them” by Edward J. Wickson, A. M.

Price, \$3.00, Postpaid

Every grower and every person interested in California horticulture should possess a copy.

IN offering our descriptive list of General Nursery Stock for the season of 1909-1910, we do so with commendable satisfaction. We have a fine stock to offer, and have greatly increased our facilities for still more, as the demand warrants it. We have leased fifty acres more of land particularly suited to the raising of good nursery stock, and **without irrigation**, as we find the discerning planter always prefers trees so grown, when he can get them.

Pedigreed Stock.

This was our specialty in starting the nurseries at this point, and we propose to "stay with it," by budding and propagating only from **selected bearing trees**. In this way we shall be gradually raising the standard of our fruits.

We propose to maintain the reputation established many years ago by introducing novelties which are of sterling worth to the fruit growers and shippers of California, and have to offer this season some of the most valuable fruits ever put upon the market; and valuable because suited to the commercial needs of Californian growers.

The Quarantine Laws

work a great hardship upon careful nurserymen; often about the dry-yards, packing houses and canneries, millions of peach moth, codlin moth, and other pests are bred, without protest, spreading more disease than would a dozen nurseries. The laws will no doubt be amended so that all alike will come under one State law, County ordinances often conflicting one with the other. A very hopeful sign of improvement is the appointing to office of more intelligent, conscientious inspectors, men with a college education and field experience, making an ideal combination. Growers and nurserymen should meet more frequently; their interests are in common.

Orders

will be filled as promptly as possible; we know the importance of this to our patrons. Our endeavor is to make a friend of every customer, and to treat him accordingly.

Packing charges are made merely to cover cost of materials used, usually about 25 cents to 75 cents a bale or box, according to size, and 10 cents or 15 cents a flat of Eucalyptus or other trees, to protect tops. Our responsibility ceases when trees are delivered to transportation company. We are centrally located, shipping facilities being excellent.

Correspondence or personal calls solicited.

Guarantee of Genuineness.

Our trees are all budded or grafted as far as possible from bearing trees, and every care and precaution is exercised to have them true to name; still with all our caution mistakes might occur, but we hold ourselves in readiness, on proper proof, to replace all trees and stock that may prove untrue to label, free of charge, or to refund the amount paid. It is mutually understood and agreed to between purchaser and ourselves, however, that our guarantee of genuineness shall, in no case, make us liable for any greater sum than that originally paid us for said trees, etc., that prove untrue.

Prices

Our prices will always be reasonable and liberal discounts made on large order. Fifty trees at hundred rates; 500 at thousand rates, etc.

APPLE

Best Early Varieties:

Red Astrachan
Red June
Duchess of Oldenburg
Eg. Strawberry
Eg. Harvest
Gravenstein
White Astrachan
Williams Favorite

Autumn:

Alexander
Bismarck
Fameuse
Hubbardston Nonsuch
King of Tomkins Co.
Yellow Bellflower
Fameuse, or Snow

1 year old

Each

Per 10

Per 100

25

\$2 00

\$16 00

Winter:

Arkansas Black
White Winter Pearmain
Yellow Newtown Pippin
Winter Banana
Baldwin
Smith's Cider
Rhode Island Greening
Marshall Red, or Red Bellflower
 (introduced by Leonard Coates)

For Market:

The best to plant largely are *Gravenstein*, *Alexander*, *Yellow Bellflower*, *Y. N. Pippin*,
White Winter Pearmain.

Per 1000, \$150.00

CRAB APPLE

The four best varieties; unequalled for jellies; good market demand:

Transcendant
Hyslop
Florence
Martha

25

2 00

PEAR

Earliest:

Seckle

Mid-Summer:

Bartlett

Autumn:

Beurre Bosc
Duchess
Howell
Beurre d'Anjou

1 year old

25

2 25

20 00

Winter:

Forelle, or Trout Pear
Winter Nelis
P. Barry
Glout Morceau

For Market:

Bartlett is the main variety, being used by canners, for drying, and shipping in car-lots.

Per 1000, \$180.00

PEAR ON QUINCE

We are making a specialty of growing Bartlett Pear on Quince root, and have a ten-acre orchard on our own grounds. The trees are less liable to blight, and bear while very young; the fruit is of very large size on this stock. Price of trees.....

Each	Per 10	Per 100
25	\$2 25	\$20 00

PEACH

We make a specialty of growing some varieties of peaches on apricot root, such trees being better on dry or sandy soils.

Earliest:

Sneed
Alexander
Hales' Triumph
Fitzgerald
Admiral Dewey
Strawberry
Brigg's May

Mid-season:

Conkling, similar to early Crawford, but
of better quality
Foster
Lovell
Wheatland
Muir
Elberta
Picquets Late
Susquehanna
Sellers Free
Lady Palmerston
Lt. Crawford

All of these are yellow freestones, and best
for canning or drying. Per 1000, \$150.50

Morris White, freestone
Salway, very late yellow
Decker; of California origin; much es-
teemed in Vaca Valley as a market
peach; good color
Ray; a new white fleshed peach of fine
quality

Note—Muir and Lovell, the leading freestone
peaches, were first propagated for sale by
Leonard Coates.

Clingstone Peaches:

Tuscan
Sellers
Persian, white
McKevitt, white
Phillips
Henrietta
Mother Porter

For canning, *Tuscan*, *Phillips*, and *Henrietta*, are the best.

25 2 00 16 00

NECTARINE

New White }
Stanwick, white flesh }
Boston, yellow flesh.. }

25 2 00 18 00

Nectarines, canned or dried, are far better flavored than any peach.

APRICOT

<i>Royal</i> , best early, and heaviest bearer	Per 1000, \$225.00	30	\$2 75	\$25 00
<i>Blenheim</i> , generally the best market sort, for canning and drying				
<i>Spark's Mammoth</i> , very large				
<i>Smyrna</i> , new, kernel is sweet like the almond				
<i>Hemskirk</i> , mid-season				
<i>Moorpark</i> , "Improved" from special tree of Col. Hersey's, at Santa Clara				
<i>Tilton</i> , increasing in favor as a first-class apricot; tree good bearer				
<i>Montgamet</i> , very large, oblong				

ALMOND

<i>Nonpareil</i> , paper shell, good bearer	25	2 00	16 00
<i>Ne Plus Ultra</i> , soft shell, long, thin nut	25	2 00	16 00
<i>I X L</i> , upright grower, good for avenues, along fence lines; very large, soft shell nut, but shy bearer unless pollenized with the help of Texas Prolific, which should be planted with them ..	25	2 00	16 00
<i>Lewelling</i> , soft shell, enormously prolific, very reliable; was introduced for sale by these nurseries..	25	2 00	16 00
<i>Peerless</i> , similar in appearance to I X L, but better bearer ..	25	2 00	16 00
TEXAS PROLIFIC , the greatest producer of them all, of the old Languedoc type, and the trees upright. Planted in rows alternate with other varieties it invariably increases the bearing quality of all, being strongly self fertile. The nut is of fine quality, and the shell medium soft	25	2 00	16 00
JORDAN , the renowned Spanish Almond of Commerce, nuts very large and long, with hard shell. In trade, the kernels are separated from shell, and sold in this way, bringing a very fancy price	25	2 00	16 00
REAMS FAVORITE , a new almond, originated in Solano County, on the borders of Napa, a great bearer, large nut, blooms late	50		

We have made a particular study of the almond, treatment of the tree, pruning, etc., and believe there is no more profitable crop to grow, where locality is suitable, and proper care is given in the selection of varieties, and treatment of the trees.

Per 1000, \$150.00

CHERRY

We grow our cherries almost entirely on Mahaleb root, finding, from long orchard experience in California, that all varieties of cherry on this root make sturdier, hardier trees, bear earlier, and stand extremes of weather much better than when on Mazzard root.

<i>Chapman</i> , seedling of Tartarian, the best early black cherry; introduced by Leonard Coates			
<i>Advance</i> , seedling of Early Purple Guigne, nearly as early and much larger; introduced by Leonard Coates			
<i>Centennial</i> , seedling of Royal Ann, larger and handsomer; introduced by Leonard Coates ..			
<i>Early Purple Guigne</i> , very early			
<i>Gov. Wood</i> , good, white canning cherry, earlier than Royal Ann	25	2 00	18 00
<i>Yellow Spanish</i> , another good light colored cherry			
<i>Black Tartarian</i> , well known			
<i>Bing</i> , very large black cherry; best for shipping			
<i>Royal Ann</i> , the standard canning variety			
<i>Lambert</i> , similar, but later			
<i>Windsor</i> , late, dull red, very good			

SOUR OR PIE CHERRIES

These are best for cooking or home canning, and many prefer them for eating fresh. They ripen over a long season, from May to end of July.

Early Richmond
May Duke
Montmorency
Belle d'Orleans
Belle Magnifique

Named in order of ripening.

NEW CHERRIES

PRUNE

	Each	Per 10	Per 100
French			
Imperial			
Sugar			
Silver			
.....Per 1000, \$200.00	25	\$2 50	\$25 00

Our "Imperial" prune trees are all propagated from the variety imported by the late Felix Gillet, under the name "Clairac," which have been proved to be the best bearers; these bear regular, heavy crops, and the trees are more spreading than "Rock's" Imperial.

PEDIGREED PRUNES

Morganhill	50	4 50	40 00
For description see special circular.			

FIG

White Adriatic			
Smyrna			
California Black, or Mission	25	2 00	

QUINCE

Orange	25		
West's Mammoth	35		
Pineapple	35		
Rea's Mammoth	25		

GRAPE

Alicante. Black, fine quality.			
Almeria. White, late.			
Black Cornichon. Very late, berries large, long.			
Black Hamburg. Earlier.			
Black Morocco. Late.			
Chasselas de Fontainbleau. White, very early.			
Emperor. Purple, late.			
Feher Zagos. White, early, skin tender.			
Flame Tokay. Large, red, late.			
Golden Queen Early; delicate Muscat flavor.			
Gros Colman. Purple, large, late.			
Lady Finger. White, late, berries long.	10	50	3 00
Malaga. Large, white, rather early.			
Muscat. Well known raisin grape.			
Muscat Hamburg. Black; Muscat flavor.			
Palomino Blanco. White; mid-season.			
Rose of Peru. Almost black, early.			
Sabal Skanski. Large, red, late.			
Sultana. Seedless raisin grape.			
Sweetwater. White, early.			
Thompson Seedless. Larger than Sultana.			
White Cornichon. Very late.			
Zante Currant. Makes the dried "currants of commerce."			
PHILIPPI GRAPE. For description see Special Circular. Cuttings	Per 10	Per 100	Per 1000
Rooted vines of Philippi, grafted on Rupestris, each,	\$1 00	\$5 00	\$40 00
			\$1.00

AMERICAN GRAPE

Each Per 10 Per 100

Particularly recommended for arbors, pergolas, or for trellising.

<i>Brighton.</i> Coppery red.			
<i>Concord.</i> Black.			
<i>Delaware.</i> Small, red, very sweet.			
<i>Diamond.</i> White.			
<i>Early Ohio.</i> Black, very early.			
<i>Eaton.</i> Black.	20	\$1 50	\$12 50
<i>Isabella.</i> Black.			
<i>Moon's Early.</i> Black.			
<i>Niagara.</i> White.			
<i>Salem.</i> Red.			
<i>Vergennes.</i> Red.			
<i>PIERCE.</i> Very large, black; see Special Circular.	15	1 25	10 00

CHESTNUT

<i>Italian</i>	25	2 00	20 00
<i>Japanese varieties, grafted</i>	50		

PECAN

<i>Seedlings from California grown nuts, 2 year</i>	15	1 25	10 00
---	----	------	-------

The pecan makes a beautiful, upright growing tree, bearing nuts best in the warmer portions of the State. Requires rich soil and plenty of moisture.

MULBERRY

<i>Russian, 7 to 10 ft.</i>	50		
<i>White, 2 to 3 ft.</i>	25		
<i>Persian, top grafted on Russian, very fine trees</i>	\$1 00		

The fruit of this variety is very large and luscious, tree a great bearer, very different to the common varieties.

Mulberry trees should be planted in every cherry orchard, as the birds will eat them in preference to any other fruit.

PISTACHIO

Sometimes called "Green Almond." Quite hardy and delights in a warm, dry situation.	25		
--	----	--	--

A very ornamental tree, bearing a small fruit in clusters, the seed of which is used in flavoring candies, ice-cream, etc.

WALNUT

<i>California Black. 2 yr. 1—3 ft.</i>	15	1 25	10 00
<i>Eastern Black. 2 yr.</i>	25		
<i>Santa Barbara Soft Shell. 3 yr. 4 to 6 ft.</i>	50	4 00	25 00
<i>Ellwood. A new walnut reproducing itself better than any other. 4 to 6 ft.</i>	50	4 00	30 00
Seedling raised by Hon. Ellwood Cooper.			
<i>Santa Rosa. Paper shell, 4 to 6 ft.</i>	50		

GRAFTED ON CALIFORNIA BLACK

Franquette, hardy, late blooming variety, nut rather long and pointed, excellent quality.

"*San Jose*" *Mayette*. Immune from blight or disease, hardy, late blooming, but matures early.

Nut very large, almost round; first class in quality. 8—10 ft.	\$2 00	15 00	125 00
6—8 ft.	1 50	12 50	100 00
4—6 ft.	1 25	10 00	90 00
1—4 ft.	75	6 50	50 00

WALNUT--CONTINUED

	Each	Per 10	Per 100
"Concord." Of same type as preceding, but tree of denser growth and heavier foliage; an enormous bearer. 3--5 ft.....	\$1 50	\$12 50	\$100 00
2--3 ft.....	1 00	8 50	75 00
1--2 ft.....	50	4 50	40 00

For further description and illustrations, see "Special List."

These trees are grafted only from guaranteed bearing trees of the true varieties. We sell no seedling Franquette or Mayette, as such seedlings are no different from any other, and very unreliable. Concord are raised in dry soil, without irrigation, and "San Jose Mayette" in moist land, irrigated, which accounts for the difference in size of the trees.

<i>Crimson Winter Rhubarb</i>	25		
<i>Linnaeus Rhubarb</i>	20		

Ornamental Department

EVERGREEN

ALL IN POTS, UNLESS OTHERWISE STATED

ACACIAS. The Acacias all thrive in dry soil, or with little or no water in summer; they are profuse bloomers, some flowering in January and others every month till late summer. Some grow tall, some are more spreading and some of bushy habit.

Acacia Baileyana. Strikingly beautiful; leaves blue-green, very feathery, 1—2 ft.	25	\$2 00	\$18 00
2—3 ft.	50	4 00	35 00
3—4 ft.	75	6 00	55 00

This is the most ornamental Acacia. It is slow growing at first, but makes a good sized tree.

A. Cultriformis. Knife-blade Acacia. Finest blooming shrub, 2—3 ft.	25	2 00	15 00
3—4 ft.	40	3 00	25 00

A. Cyanophylla. Blue-leaved wattle. Very broad leaves; handsome tree.

A. Dealbata. Silver wattle. Rapid growing, similar to Mollissima, but blooms later. Small 1 yr. tree

A. Floribunda. Very free blooming. May be trained as a street tree or as a shrub, 3—4 ft.	30	2 50	20 00
6—8 ft.	50	4 00	35 00

A. Latifolia. Handsome blooming shrub of spreading habit. 3—4 ft.	25	2 00	15 00
4—5 ft.	35	2 50	20 00
5—6 ft.	50	4 00	35 00

A. Mollissima. Rapid growing. Feathery foliage; blooms very early. 10—12 inches.	20	1 50	12 50
2—3 ft.	25	2 00	15 00

A. Melanoxylon. "Black-wood"; upright grower; best street tree. This variety, planted in good valley land, is very profitable as a timber tree, the wood being used for gun stocks, pianos, billiard tables, etc. 2—3 ft.	25	2 00	15 00
4—5 ft.	30	2 50	20 00
5—6 ft.	50	4 00	35 00

In flats of 50 trees, 2—3 and 3—4 ft, \$2.50 each flat.

A. Pyrenantha. Golden wattle. Very handsome tree; large leaves. 1—2 ft.	20	1 50	12 50
2—3 ft.	25	2 00	15 00
3—4 ft.	40	3 00	25 00

A. Pendula. (New) Weeping Myall. Very ornamental. 1—2 ft.

A. Spectabilis. (New) Very ornamental. Small trees.

Angophora Subvelutina. "Apple Tree." Allied to the Eucalyptus. 1—2 ft.	25	2 00	
2—3 ft.	30	2 50	

Casuarina Stricta. "Beef-wood." Branches long and slender, with jointed needle-like leaves, having the appearance of a pine tree, but more graceful. Wood red, very hard and durable; upright growing. 2—3 ft.	25	2 00	15 00
3—4 ft.	35	2 50	20 00

C. Equisetifolia. More spreading in habit and even more valuable for timber. Pruned to a round head no tree is more graceful and unique. 3—4 ft.

C. Quadrivalvis. Similar to above in habit. In flats of 100 plants, each \$2.50 per flat.

Note: The Casuarinas are among the most valuable recent introductions from New Zealand, being peculiarly adapted to the arid conditions in California.

Camphor. Very robust, handsome shrub or small tree, with bright, glossy foliage. This is the "Camphor" of commerce and is being planted commercially in Florida, in the Imperial Valley, California, and elsewhere. It grows well almost anywhere, but requires heat to give profitable camphor content in the process of distillation. 1—2 ft. strong bushes.	35	2 50	20 00

<i>Ficifolia</i> . Ornamental. 6 in—1 ft.....	50		
<i>Goniocalyx</i> . Adaptive. Hardy. Tough, durable timber. 6 in.....	25	2 00	
<i>Gunnii</i> . Grows anywhere. Very hardy. Fair timber. 1—2 and 2—3 ft.....	25	2 00	
<i>Globulus</i> . Adaptive. Rather tender while young. Valuable timber. 1—2 ft.....	15	1 25	
2—3 ft.....	25	2 00	
3—4 ft.....	40	3 00	
<i>Gomphocephala</i> . Adaptive. Hardy. Very tough, strong timber. 6 in.....	25		
<i>Hæmastoma</i> . Coast. Dry soil. Fair timber. 6 in.....	25		
<i>Leucoxylon</i> . Grows anywhere. Useful timber. 1—2 ft.....	15	1 25	
2—3 ft.....	25	2 00	
<i>Leucoxylon-rosea</i> . Ornamental. 6 in.....	25		
<i>Longifolia</i> . Coast. Durable timber. 1—2 ft.....	15	1 25	
2—3 ft.....	25	2 00	
3—4 ft.....	40	3 00	
<i>Muelleri</i> . New. Hardy. Valuable. 3—4 ft.....	30	2 50	
4—5 ft.....	50	4 00	
<i>Maculata</i> . Coast. Very valuable timber. 6 in.....	25	2 00	
<i>Obliqua</i> . Warm climate, light soil. Valuable hardwood. 1—2 ft.....	15	1 25	
2—3 ft.....	25	2 00	
<i>Occidentalis</i> . New. Ornamental. 1 ft.....	50		
<i>Pauciflora</i> . Hills. Very hardy. Useful. 6 in.....	25		
<i>Pilularis</i> . Coast. Valuable timber. Largely used for telegraph poles. 1—2 ft.....	15	1 25	
2—3 ft.....	25	2 00	
<i>Polyanthema</i> . Warm climate; stands arid conditions well. Very hardy. Valuable timber. 1—2 ft.....	15	1 25	
2—3 ft.....	25	2 00	
<i>Robusta</i> . Wet swampy land. Hardy. Durable underground. 6 in.....	25		
<i>Rostrata</i> . Adaptive. Stands heat, but likes moisture at roots. Very hardy. Valuable timber. 3—4 ft.....	25	2 00	
<i>Resinifera</i> . Coast. Moist conditions. Very valuable timber. 6 in.....	25		
<i>Regnans</i> . Moist conditions. Hardy. Very strong timber. 2—3 ft.....	25	2 00	
<i>Rudis</i> . Hot. Likes root moisture. Very hardy. Good timber. 2—3 ft.....	25	2 00	
<i>Stuartiana</i> . Coast. Very hardy, good, hard timber. 2—3 ft.....	25	2 00	
<i>Siberiana</i> . Hilly. Very hardy. 1—2 ft.....	25		
<i>Sideroxylon</i> . Coast. Rocky soil. Very useful timber. 1—2 ft.....	25	2 00	
<i>Siderophloia</i> . Coast. Very valuable and strong timber. 1—2 ft.....	15	1 25	
2—3 ft.....	25	2 00	
<i>Tereticornis</i> . Adaptive. Very hardy. Valuable timber. 2—3 ft.....	25	2 00	
<i>Urnigera</i> . Mountains. Very hardy. Useful timber. 1—2 ft.....	25	2 00	
2—3 ft.....	40	3 00	
<i>Viminalis</i> . Adaptive. Stands heat well. Very hardy. Valuable flooring timber. 2—3 ft.....	25	2 00	

Many other species being tested.

EUCALYPTUS--Continued.

Per 100 Per 1000 Per 10000

Eucalyptus in Flats for Early Commercial Planting.

We have the following species, strong, well-hardened trees, inured to all sorts of weather; not tender like coast-grown plants, neither tall and "weedy" like those grown under too much shade, as must be done in raising seedlings in the interior.

Quoting from a customer in the Sacramento Valley: "Those we got of you did very well, while what we obtained from ——— nearly all died; they were too tender."

We particularly recommend *Early Planting*. We planted ten acres of *tereticornis*, *rostrata* and *corynoclyx* early in December, 1908, and not one plant failed to grow out of 11000. This was in valley land, Santa Clara county, and the planting was followed by nearly two weeks of frost, when the thermometer fell below 20°. This grove is within a mile of Morganhill Station.

Heavy land, like adobe, should be plowed in early summer and left fallow. It can then be easily harrowed after the first rains, and planted. Indeed, to get a good start and the full benefit of the early rains, all land should be so treated.

While there are several theories in regard to the planting in permanent forest form, we believe 6x6 feet, with the omitting of an occasional row for an avenue, to be the best distance. If different from this, let it be closer rather than wider apart. In every plantation of seedlings, some are always weaker than others. To take out adjoining trees will make them no stronger; they are weak constitutionally and will remain so. Therefore, remove them and leave the stronger; it is a matter of the "survival of the fittest." The smaller ones can be used for tool handles, insulator pins, agricultural implements, etc., and nothing is lost.

Setting the plants is just as simple as setting out a tomato field, and the inclusive cost per acre may be \$25.00 or more, according to number and method of handling. Always plant deeper when removing from pot or box; press firmly in the moist ground, and leave earth loose at surface. If soil is dry, or season late, water should be used, but never forget to keep surface loose.

We shall be glad to furnish any other information available, give estimates, etc., and we particularly invite those interested to call and see our nurseries and forest plantations.

Our method of loading a car insures safety at minimum of cost; 40,000 to 50,000 plants in car.

A Few Thousand of the Following Varieties: 1½ years old, 50 in a flat, twice transplanted. extra strong, mostly 2—3 feet high, at \$5.00 per 100, \$25 00 per 1000: *Cornuta*, *Diversicolor*, *Gunnii*, *Polyanthema*, *Corynocalyx*, *Rostrata*, *Urnigera*, *Stuartiana*.

DECIDUOUS TREES

OR THOSE WHICH DROP THEIR LEAVES.

	Each	Per 10	Per 100
Catalpa speciosa. Very large leaves, purplish flowers. Desirable for street tree if kept well pruned; planted largely for railroad ties, posts, etc. 2—3 ft.....	25	2 00	18 00
6—8 ft.....	75	6 00	50 00
Catalpa Bungeii. A Japanese variety of the Catalpa, with very dense, compact, round head, giving most unique effect. Top budded trees, 6—8 ft.....	\$1 00		
Cedrela Sinensis. From North China. Beautiful tree, bearing panicles of small white flowers. 3—4 ft.....	75		
Elm, American White. 6—8 ft.....	50	4 50	40 00
“ Cork. 4—6 ft.....	50	3 50	30 00
Linden, platyphyllos. European Linden. 3—4 ft.....	40	3 50	30 00
“ Americana. American Linden, or Basswood. 3—4 ft.....	40	3 50	30 00
Locust, Robinia pseud-acacia. Black Locust. 3—4 ft.....	40	3 50	30 00
“ Bessoniana; grafted trees; umbrella locust, thornless. 6—8 ft.....	75	6 00	
“ Decaisneana. Pinkish flowers. 6—8 ft.....	75	6 00	
“ Semperflorens. Blooms all summer. 8—10 ft.....	75	6 00	
Maidenhair Tree, or Ginko. Very ornamental tree from Japan and China. Small trees.....	25		
Mountain Ash. Symmetrical, upright grower; its white flowers followed by scarlet berries make it very attractive. 5—7 ft.....	50	4 50	40 00
Mulberry, Russian. Very desirable as a shade tree. 6—8 ft.....	75	6 50	50 00
“ White. 4—5 ft.....	50	4 00	30 00
“ Persian. Large fruited. Top budded trees. 6 8 ft.....	1 00		
Maple, Silver. Most rapid growing in California climate. 4—6 ft.....	50	4 50	40 00
“ Scarlet. 3—4 ft.....	40	3 50	30 00
“ English. Holds its leaves longer than the others. 3—4 ft.....	40	3 50	30 00
Paper Mulberry, Broussonettia papyrifera. Large, stiff leaves; handsome shade tree. 2—3 ft.....	50	4 00	
Plane, European. The finest of all deciduous trees for street planting. 4—6 ft.....	50	4 50	40 00
Sophora, Japanese Pagoda tree. Dark green, glossy foliage, white flowers. 3 ft.....	50		
Taxodium. Bald Cypress. Tall growing tree from Southern States; feathery foliage; requires plenty of moisture. 3 ft.....	50		
Texas Umbrella. 4—6 ft.....	50		
Tulip Tree; Liriodendron. Tall, rapid-growing, leaves glossy, fiddle-shaped, yellow tulip-like flowers. 3—4 ft.....	50		
Weeping Willow, Salix Babylonica. 6—8 ft.....	50		

DECIDUOUS SHRUBS

Althea. Rose of Sharon. Four colors, white, pink, purple, red. Strong bushes.....	35
Broom, Andreana. Flowers yellow with deep crimson wings.....	50
“ White flowering.....	50
Cydonia. Japan quince. Large, crimson flowers.....	35
Deutzia. Four colors, white, pink, crimson, dark red.....	35
Dogwood, Cornus. Three varieties. The chief beauty is in the bright and changing colors of the foliage.....	35
Elder, Sambucus. Two varieties, one golden leaved and the other dark green foliage.....	35
Hawthorn, Crataegus. Two varieties, red and white flowering.....	35
Lilac, Syringa. Four varieties, white, light mauve, purple, dark purple.....	35
Mock Orange, Philadelphus. Sweet-scented, orange-like flowers.....	35
Smoke Tree, Rhus cotinus. Covered in summer with pinkish, feathery flowers.....	35
Snowberry, Symphocarpus. Well-know shrub; white, waxy berries.....	35
Spirœa. Universal favorites. Five varieties, white and crimson flowering.....	35

DECIDUOUS SHRUBS--Continued.

	Each	Per 10	Per 100
Stephanandra. Snowy, white flowers; graceful habit.....	35		
Tamarisk. Three varieties. Feathery foliage, pinkish flowers.....	35		
Viburnum. Snowball. Three varieties.....	35		
Weigela. Showy flowering shrubs; some with white flowers and some rose-colored..	35		

We will make up assortments of these beautiful flowering shrubs,
very strong bushes, at \$3.50 per dozen.

CLIMBING PLANTS

Akebia. From Japan. Hardy vine, beautiful foliage, old rose-colored flowers.....	35		
Ampelopsis. Virginia creeper.....	35		
“ Q. Engелеmani. New variety, rapid grower.....	35		
“ Muralis. For growing up walls or over buildings	35		
“ Veitchii. Boston Ivy. Fine leaves.....	35		
Bignonia Grandiflora. Large flowered Trumpet Vine.....	35		
“ Sanguinea. Smaller. Deep red flowers.....	35		
Dolichos. Australian Pea Vine. Rose colored flowers.....	25		
Honeysuckle. Rose color and white.....	35		
Swainsonia. Crimson flowers.....	25		
Smilax.	25
